

## Single Sided Indoor Merchandising Systems

### BENEFITS

Cost Effective & High Quality illuminated Merchandising display systems in standard or custom-made designs, size, and colours. Designed to ensure ease of operation and maintenance. Other benefits include:

- Very low maintenance with rapid fluorescent tube access
- Easy and fast translite change with hinged magnetic trim
- Effective and safe translite retention
- Includes a new curved face design
- Designed specifically to exclude loose parts

### SPECIFICATIONS

The Coates Signco Rollerboard™ Single Sided in one size only:

- Single Module - 715mm in height, accommodating one single translite.
- Bright backlit illumination.
- Custom size available.

The Rollerboard™ units are electrically wired for 220v - 240v, 50Hz as standard. 110v wiring and or special electrical requirements are also available.

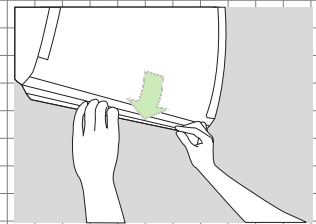

### TRANSLITE SIZES

For best result we recommend satin finish translites to be used.

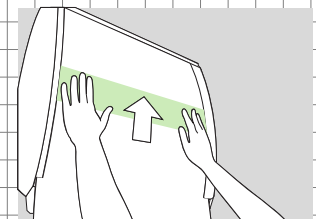

The Coates Signco Rollerboard™ accommodates translite size:

- Single: 630 x 700mm allow + 1mm-3mm tolerance

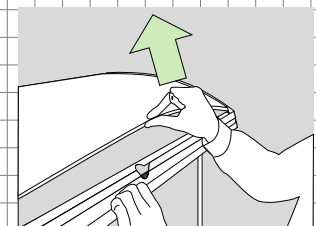

Preferred translite thickness is 0.3mm (0.0188")

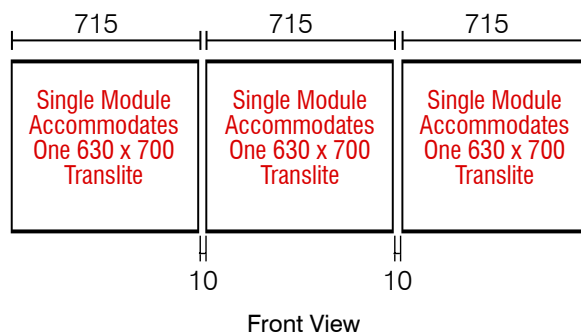

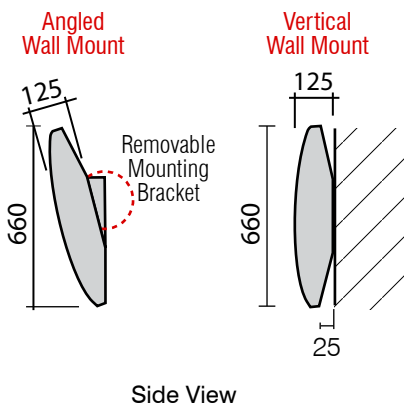

Ease open magnetic trim at bottom edge of unit

Gently push translite into place and under top trim

Simple fluorescent tube access
